

VENTURE VIRTUAL OFFICE

Rue de la Science, 8 – 6900 Aye, Belgique

IDELUX Développement is an economic development and business investment institution for the province of Luxembourg, Wallonia, Belgium. IDELUX Développement is uniquely partnered with the Brazos Valley Economic Development Corporation (BVEDC) in Bryan-College Station, Texas to assist Texas emerging technology companies. IDELUX Développement operates Novalis, a world-class science and technology park with emerging technology business incubator-accelerator facilities and services.

Novalis offers a picturesque gateway venue to connect into Europe’s industrial hubs and markets. Through IDELUX Développement at Novalis, emerging technology companies can access innovation economic development resources throughout the Wallonia region of Belgium and the greater European Union. To that end, Novalis features a venture virtual office for emerging technology companies that specialize in the fields of biological and environmental sciences, clean energy, water, life sciences, medical devices, and information-communication technologies.

Through connecting the resources of IDELUX Développement and BVEDC, Texas emerging technology companies have the opportunity to prospect entry into the European market via Novalis. Similarly, companies from Wallonia, Belgium and its Luxembourg province can explore entry into the U.S. market via the BVEDC’s International Gateway.

To accelerate a company’s in-country launch and growth, access to IDELUX Développement-BVEDC venture virtual offices and a wide range of assistance are available FREE of charge to qualifying companies for a 90-day period.

VENTURE VIRTUAL OFFICE

800 Raymond Stotzer Parkway – College Station, Texas 77845

The Brazos Valley Economic Development Corporation (BVEDC) is a public-private economic development corporation serving the Bryan-College Station, Texas region. The BVEDC is uniquely partnered with IDELUX Développement in Wallonia, Belgium’s southern province of Luxembourg to assist emerging technology companies. The BVEDC operates the International Gateway, a “soft landing” program to assist international emerging technology companies exploring entry into the U.S. market via Texas.

The BVEDC supports the Brazos Valley Innovation Center, a science and technology business incubator-accelerator. The centre connects innovation economic development resources of The Texas A&M University System and Texas Triangle industrial marketplace that is Dallas-Fort Worth, Houston and San Antonio-Austin. It features The Garage, a co-working space with a venture virtual office for emerging technology companies that specialize in the fields of biological and environmental sciences, clean tech (energy and water), life sciences (biotech and medical devices), and information-communication technologies.

Through connecting the resources of the BVEDC and IDELUX Développement, companies from Wallonia, Belgium wishing to prospect entry into the U.S. market can do so via the BVEDC’s International Gateway. Similarly, Texas emerging technology companies have the opportunity to prospect entry into the European market via Novalis, an IDELUX Développement supported science park with emerging technology business incubator-accelerator facilities and services.

To accelerate a company’s in-country launch and growth, access to BVEDC-IDELUX Développement venture virtual offices and a wide range of assistance are available FREE of charge to qualifying companies for a 90-day period.
